

Protect the young athletes you know and love with a free screening!

The leading cause of sudden death among young athletes is sudden cardiac death (SCD). Every three days in the U.S., a student athlete dies of SCD. Usually there are no advance signs or symptoms.

Miami Children's Hospital is reaching out to the region's young athletes by offering free EKG screening to middle and high school sports participants.

Screenings are performed at:
**MCH Nicklaus Outpatient Center
Legacy Place
11310 Legacy Avenue
Palm Beach Gardens, FL 33410**

Mon - Fri: 4pm - 5pm

Sat - Sun: 4pm - 5pm

For more information, or to make an appointment, please call **561-624-9188**

Screenings at the center are made possible through the generosity of the Honda Classic

MIAMI CHILDREN'S HOSPITAL
Nicklaus Care Center

*"No child should die from a preventable cause.
Please consider this free screening test as our gift to your family."*

- Dr. Anthony Rossi, Director, MCH Cardiac Intensive Care Unit.
